

1/4 turn Cap for tubes

This cap features a 1/4 turn gesture for the opening. The cap will stay on the tube while the formula flows through the central orifice. The tube can stand alone on the cap. After using the product, the user simply turn the cap to close it.

PRODUCT STORY

1/4 turn cap for plastic and Purefoil tubes This convenient cap remains assembled on the tube, decreasing the risks of misplacing it. The tube is hygienic as residual formula is evacuated of the nozzle when it is closed.

TECHNICAL INFORMATION

- Diameter: 35mm to 50mm
- Filling capacity: 40ml to 375ml

CUSTOMER BENEFITS

The 1/4 turn cap is easy to open and close with no risk of misplacing it. It has no detachable parts, making life easier for the user. After usage, residual formula is evacuated from the nozzle so the tube is hygienic. Click sound adds excitement and is reassuring to usage.
