

Bio-based Foam bottles

A sustainable foam bottle

PRODUCT STORY

FOAM BOTTLES MADE FROM SUGARCANE, A RENEWABLE RESOURCE

- Use Biobased PE to reduce your foamer's carbon footprint
Reduction by 36% in comparison with virgin material foamer (European clients)
- Contribute to reducing the level of greenhouse gas emissions
1kg of Biobased PE captures 2,78kg of CO₂
- Promote 100% recyclable foamer
Biobased PE has the same properties as virgin PE – thus allows its recyclability

TECHNICAL INFORMATION

Technical information

- Neck finish: Ø43mm
- Volume: 150ml
- Compatible with F2 & F3 pumps
- Any specific colour available on request
- Standard decoration: silk screening and hot-stamping
- Production site : Alkmaar (Netherlands)
