

Child Resistant Closures (CRC) - Squeeze & Turn

Squeeze & Turn Child Resistant head and closure design meets USA Consumer Product Safety Commission's Guidelines for CR packaging.

The solution is not only resistant for children, very protective

PRODUCT STORY

Squeeze & Turn Child Resistant head and closure design. Very intuitive gesture - similar to that of medicine bottles. The user squeezes the cap and not the tube. This reduces the risks of spilling formula. Ideal for creams, lotions and ointments.

Albea CRC is USA Consumer Product Safety Commission's (CPSC) guidelines compliant for CR packaging / FDA.

Made in North America.

TECHNICAL INFORMATION

North America:

- Diameter: 28mm / 1-7/64in, 35mm / 1-3/8in and 1-5/8in.
- Filling capacity: from 34 to 178 ml

CUSTOMER BENEFITS

Users can be assured that product cannot be used by a child. Instructions of use are conveniently embossed on the top of cap. Easy opening with no mess. Pressure is applied to cap sidewalls, not the tube body, avoiding spillage of the formula. One piece "squeeze and turn" cap with audible "click" when closing.
